Seating Policy for Graduate Students, Visiting Scientists, and Post Docs
Food Science Building, Athens

In many cases, there is limited seating available for graduate students, visiting scientists, and postdocs in the research laboratories of individual faculty members within the department in Athens. When available the assignment of these spaces is the responsibility of the individual faculty member assigned that lab space.

There are some rooms within the Food Science Building in Athens with desk space for individuals who do not have an assigned desk in a research lab. With several spaces on the 1st and 3rd floor we should be able to distribute the individuals close to their lab assignments. Students working with faculty with primary oversight of Rooms 344, 350A-E and 358 do not have desks in the research labs but seating is available in Room 333 (7 desks total). The other rooms available for seating assignments and their seating capacity are:

- Room 115 has 6 spaces
- Room 117 has 6 spaces
- Room 129 has 3 spaces for visiting scientists/post-docs
- Room 133 has 1 space for a visiting scientist/post-doc

Assignment Guidelines:

1. Most graduate students are typically housed in their major professor’s research laboratory. The exceptions are those working primarily in Rooms 344, 350A-E and 358 who are provided desk space in Room 333 for safety reasons.
2. Each faculty member in residence in Athens who supervises graduate students is entitled up to 2 desks in either Rooms 115 or 117. Athens faculty supervising visiting scientists or postdocs will have space in either Room 129 or 133 based on availability (Postdocs have prior over visiting scientists).
3. Desks not allotted to individual Athens faculty members will be assigned based on need.
4. Graduate students actively involved in laboratory research or with assigned teaching responsibilities under the supervision of Athens Food Science faculty and who do not have a desk provided in their research laboratory are eligible for space in either Rooms 115 or 117.
   a. Graduate students with an established advisory committee with a major professor in Athens will be given a higher priority than new graduate students or Griffin students.
   b. Graduate students working with Athens faculty are given priority over visiting scientists.
   c. If insufficient progress on research activities is reported by the advisory committee or project supervisor, then desk access to the individual will be revoked.
   d. Space for Griffin students will be provided when available. However, this is a low priority since typically these students are not actively involved in research or teaching activities while in Athens.
7. A form is provided to request space. Complete the form and return it to the graduate coordinator assistant.
8. The request will be honored based on the availability of space.
9. An inventory of who is using assigned space will be taken once a semester. If assigned space is not being used, it will be considered available for reassignment to others.
