

From Athens to Griffin

Take U.S. 78 west toward Atlanta. At Monroe, take the exit for Ga. 138 and head southwest toward Conyers.

At Conyers, cross over I-20 and continue through about four stoplights. Head straight onto Ga. 20 toward McDonough. Do **not** turn right onto Ga. 138.

Continue on Ga. 20 to Oak Hill and a four-way stop. Oak Hill Baptist Church is across the intersection on the right. Turn right and continue on Ga. 20.

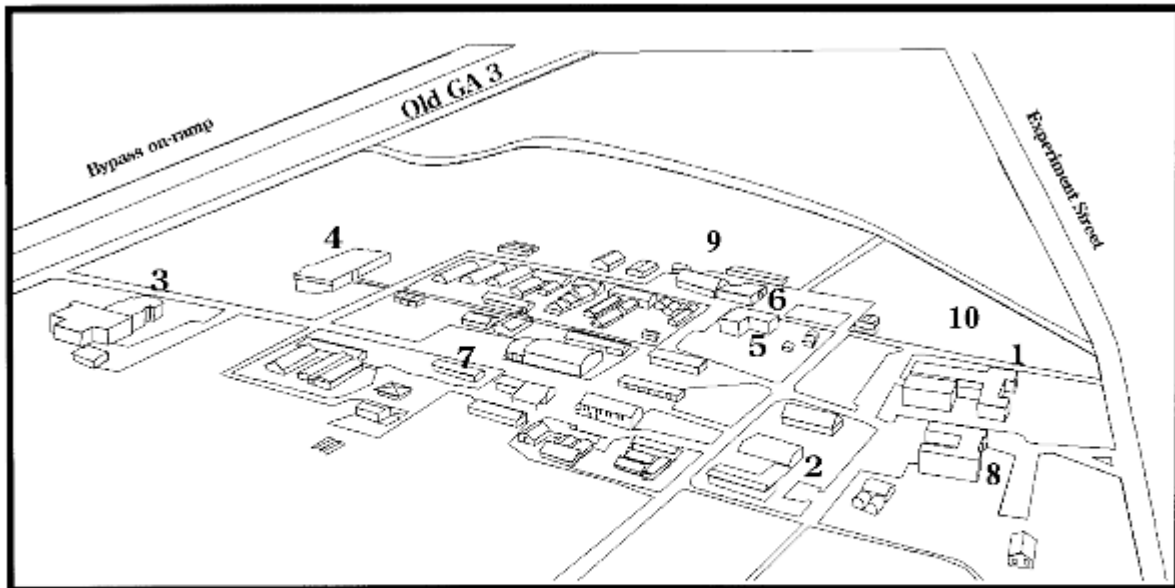

Merge with Ga. 155 upon entering McDonough. Continue south on Ga. 155, and cross Interstate 75. Continue south on Ga. 155 into Spalding County. You will reach a four-way stop at a Texaco gas station. Turn right and stay on Ga. 155 for .25 mile. Ga. 155 will veer to the left, but you should veer **right** onto McIntosh Road (there is an old gas station in the center of this 'Y').

Stay on McIntosh Road approximately 5 miles to a four-way stop. Continue straight on McIntosh Road, about 3 miles, over a small bridge and dead end into Ga. 3.

Turn left onto Ga. 3 and proceed .75 mile to a stoplight. Turn left onto Experiment Street. This is more of an "X" type intersection.

Travel about .6 mile on Experiment Street to a three-way stoplight. Continue straight and cross railroad tracks (now paved over, but they can be seen on either side of the road). Continue straight on Experiment Street to the main entrance on the right.

Upon entering the campus, the Stuckey Building is on the right, the Flynt Building is on the left.
